Aquilino Residence Project Overview

PROJECT HIGHLIGHTS

The Aquilino Residence was designed with simplicity in mind, a true modern work of art. Here, Ecosteel delivered what prefab and traditional construction could not. Highlights include:

- 1,900 sq. ft
- R-32 roof and R-24 walls for extreme thermal efficiency in a mild climate
- Exterior style perfect for the wall panel system
- Structural steel provides the strongest protection against extreme California earthquake and fire potential

BUILDING MODEL

4" Steel Insulated Roof Panels
rated R-32

Pre-cut, pre-drilled steel beams are made of at least 76% recycled content and come in a kit ready for assembly

3" Steel Insulated Wall
Panels rated R-24

ECOSTEEL SYSTEM SOLUTIONS

3D Modeling and Detailing

All EcoSteel systems are pre-engineered using the latest 3-Dimensional technology available. This precise engineering ensures the highest level of quality and provides a more creative and realistic design process.

Insulated Wall and Roof Panels

We provide insulated steel panels that are suitable for the most extreme temperatures. Our interlocking tongue-and-groove system strengthens energy efficiency and eliminates thermal gaps. With the installation of the exterior panels, you have a dry and lockable shell ready for your finish contractors.

Steel Frame

Construction starts with our pre-cut, pre-drilled and labeled beams for rapid onsite assembly. Our clear-span curtain wall structure eliminates the need for load-bearing interior walls, freeing up space and enabling creative, cutting-edge designs.

The Best of Both Worlds

The EcoSteel system can take any design, no matter how unique, and engineer it to fit steel manufacturing standards. The result is pre-cut, pre-drilled, labeled beams and framing members that can be shipped virtually anywhere. Unlike prefabricated buildings, you assemble the structure on site, eliminating the need for massive cranes and movers. Unlike traditional construction, the parts are precision cut with all the quality control you would expect from any steel manufacturer. You get the speed and quality of prefabrication with the flexibility of traditional construction. Our detailed erection documents make assembly a quick and easy breeze.
