Goshawk Project Overview

PROJECT HIGHLIGHTS

The Goshawk Ranch project is a showcase in sustainable design and construction methods. Green Building features include solar powered radiant heat and low voltage lighting, along with a large electric generating windmill and a robust grey water irrigation system. Features a private rope tow/ ski hill, as well as an outdoor amphitheater.

Park City, UT

Studio 255 Architects

Building Program:

- 6,500+ SF Mountain Contemporary Home
- Vaulted Ceilings Throughout
- Large Clearspans of Low-E Glass
- Superior Energy Efficiency
- Extreme Snow Load Requirements
- Superior Energy Efficiency

3D DESIGN

The Goshawk Ranch House was designed using EcoSteel's 3D tools. This allows greater flexibility and visualization throughout the design process.
