About

EcoCottages offers the world's finest prefabricated, panelized cottage kits. All of our Building Systems are pre-drilled and pre-marked. First-time kit builders can assemble these packages with readily available equipment and tools. Our Insulated Steel Panel Systems and Steel Structure will ensure decades of maintenance free, energy efficient, comfort and safety.

Simply bolt together the prefab frame to a concrete slab or the optional steel subfloor. The next step is to attach the windows and doors. Finish the exterior by simply attaching the prefinished roof and wall sheets along with included trim.

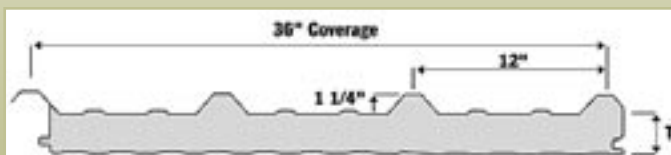

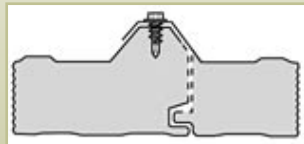

Prefab EcoCottage Kits Assemble In Days

Assembly Sequence

Pre-insulated Exterior Roof & Wall Panels

The RWP Panel functions well as a roof or wall panel when used in conjunction with pre-engineered building framing systems.

Why Steel?

- EcoCottages can reduce insurance costs.
- Inorganic does not rot, mold, warp, split.
- Termite Proof. Extreme fire and wind resistant.
- Consistent Quality: The EcoCottage Steel is produced in strict accordance with national MBMA specifications.
- Steel has a very high strength to weight ratio.
